

Case Study: Probo Medical

“Excellent Service from a team with proven industry experience. Overall, a very smooth process and very happy with the quick turnaround.” - Probo Medical

Probo Medical & UCH Export Packers

Supporting the largest ultrasound equipment distributor in the world.

Probo Medical, the world's largest diagnostic imaging equipment distributor, grew from a small business in Indiana into a multinational company with over 10 sites globally, offering services & imaging equipment to medical practices worldwide.

As a multinational, distributing high value medical equipment such as MRI machines & CT scanners, Probo Medical have partnered with UCH Export Packers to ensure their consignments arrive on-time & intact.

Expertly Packed, On Time

Distributing 6000kg high value MRI Machines & CT scanners not only requires space, but also equipment & expertise as well as the ability to work within timelines for engineers relying on just-in-time arrival of equipment.

With over 100,000 sq ft of warehouse space at Heathrow & a fully equipped packing division; UCH Export Packers is able to handle the receipt, storage, packing & loading of Probo Medical's consignments to the USA.

Bolted & Loaded

To ensure short turnaround times, UCH Export Packers prefabricate bespoke pallet bases to exact specifications, prior to the machinery's arrival.

On arrival, machines are lifted using Hi-Ab flatbeds, positioned precisely onto the bespoke pallet base & secured for transport. To protect the systems, barrier foil is used to protect from moisture when travelling by sea. Our team then plan the container load & load the cargo, ready for export.

“Excellent Service from a team with proven industry experience. Overall, a very smooth process and very happy with the quick turnaround.” – Probo Medical.
